FedChem's Statement on REACH

FedChem fully supports the Registration, Evaluation, Authorization, and Restriction of CHemicals (REACH) objectives of improving the chemical regulatory system, including protection of human health and the environment as well as increasing knowledge on hazards and risks of chemical substances.

FedChem is pleased to inform its customers that we intend to comply with all REACH regulations as they apply to our products. FedChem, its customers, and suppliers will work as a team in order to satisfy the requirements of REACH. The REACH regulation puts responsibility on users of substances to ensure that the uses of the substance are identified and included in the registration and to provide relevant risk assessment data. Over the next several years, FedChem will contact its customers requesting identification of uses and other relevant data for preparations manufactured or imported into the EU.

In the mean time; please feel free to contact me directly with any questions.

Kind regards,

Jennifer Lundell
Regulatory Compliance Administrator
